

All Tech Energy announces an agreement with Nestlé USA for an Energy Management Project at the 860,000 sq. /ft. DeKalb Midwest Distribution Center

Schaumburg, IL – February, 2006 – All Tech Energy announced today that it has entered into an agreement with Nestlé USA to participate in a lighting retrofit project at the DeKalb Distribution Center in northern Illinois. The project is expected to include the installation of fixtures and occupancy sensors.

Nestlé USA is part of Nestlé S.A. of Vevey, Switzerland - the world's largest food company. Headquartered in Glendale, California Nestlé USA employs over 15,500 people nationwide and currently operates 20 manufacturing facilities, 5 distribution centers, and 12 sales offices across the country. The agreement covers Nestlé USA's 860,000 square foot DeKalb Distribution Center which provides logistics and warehousing services within the Midwestern States.

“We are delighted to work with Nestlé USA and are extremely pleased with their proactive approach to energy conversation”, stated Kathy Esposito, President of All Tech Energy. “Nestlé USA has become the most recent national leading customer to facilitate a facility-wide lighting retrofit project. Similar to our other leading national and international customers, Nestlé USA brings us a great potential reach for energy conservation programs in other markets across North America.”
